Warranty

Server Products equipment is backed by a two-year limited warranty against defects in materials and workmanship. For our complete warranty statement, see our Web site or contact us.

Bid Description

Constructed of stainless steel, each condiment pump features a rugged cast valve body and welded construction. A pump and jar drop into a counter or can be placed into a Serving Bar. An insulated Serving Bar can be cooled with ice, one Eutectic Ice Pack per pump or our deep fountain HOLDCOLD™ jars. HOLDCOLD™ jars will maintain serving temperature up to twelve hours, when used properly.

The CP-F will pump condiments from a deep fountain jar. Maximum stroke yields 1 1/4-ounce (37 mL). Gauging collars are supplied to reduce yield in 1/4-ounce (7 mL) increments.

The CP-200 is designed to pump condiments from a standard shallow fountain jar. Maximum stroke yields 1-ounce (30 mL) with gauging collars supplied to reduce yield in 1/4-ounce (7 mL) increments.

Standard Features

Durable, stainless steel construction

CP-F; maximum stroke yields 1 1/4-ounce (37 mL)

CP-200; maximum stroke yields 1-ounce (30 mL)

Easy-to-adjust portion control in 1/4-ounce (7 mL) increments

Two cleaning brushes included for pump maintenance

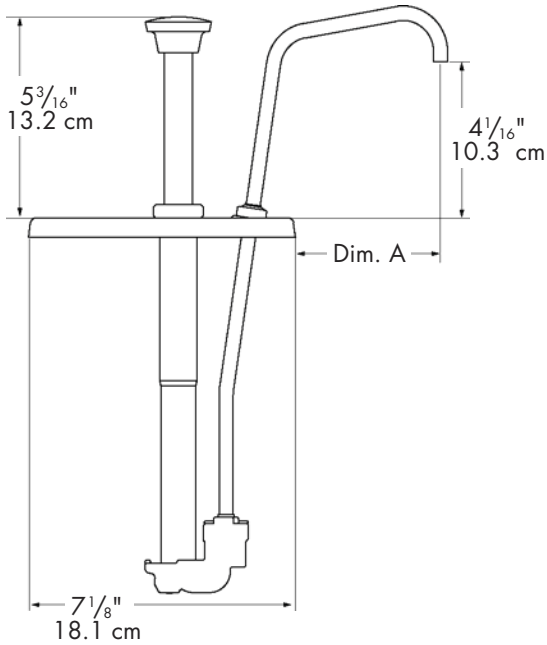

Colored, engraved knobs to identify flavors are available upon request. For options, contact our customer service department.
