Bid Description

The Food Server Advantage™ is designed to dispense fudge and caramel from a specialized Cryovac® pouch with fitment. Advantage™ units are constructed of a stainless steel enclosure with a brushed (#4) finish, ABS plastic lid and high-temperature molded top. Pump is stainless steel with welded construction. Includes Caramel and Fudge magnetic signs for merchandising.

An adjustable precalibrated thermostat controls twin heating elements cast in the food vessel. A third heating element is bonded to the aluminum paddle plates. The central paddle is located between (2) #10 pouches. A spout warmer keeps topping warm and ready inbetween servings.

Temperature settings are marked on the thermostat knob. Power is controlled with an ON/OFF rocker switch. An interlock switch cuts power to paddle when the lid is removed.

Capacity is (2) #10 pouches (3 qt, 2.8 L) with fitment. Pump valve features captured stainless steel balls. Maximum stroke yields 1 ounce (30 mL) with gauging collars supplied to reduce yield in ¼ ounce (7 mL) increments. Exclusively uses a Cryovac® pouch with fitment.

Standard Features

Closed, sanitary system dispenses from (1) pouch while warming a second pouch to serving temperature

Outside of pump remains clean

Evacuation*: 96% fudge, 97% caramel

Pump design prevents loss of valve balls

Portion control pump offers 1, ¾, ½, and ¼ oz servings

Magnetic merchandising signs attract attention

Food Server Advantage™ Accessories

- Cylinder-side cleaning brush 82049
- Spout-side/cast valve cleaning brush 82526
