# MAX<sup>TM</sup> AUTOMATIC SLICER

NEW! EXTRA WIDE 1 3/16" CUT

The Univex #8512 is a heavy duty 12" gear driven automatic slicer with a 1/2 hp motor and a net weight of 108 lbs. Weight and horsepower play an important role in slicing. Cheese, in particular, demands both horsepower and weight for continued production of precision slices. The Univex 8512 slices at a rate of 35 strokes per minute providing both stability and precision slicing. A redesigned slice control mechanism now allows slices up to 1 3/16" thick. As with all Univex slicers, the 8512 comes equipped with a German hollow ground cutting blade and built in sharpener. An easily accessible switch arm can convert the 8512 from automatic to manual operation.

## WARRANTY

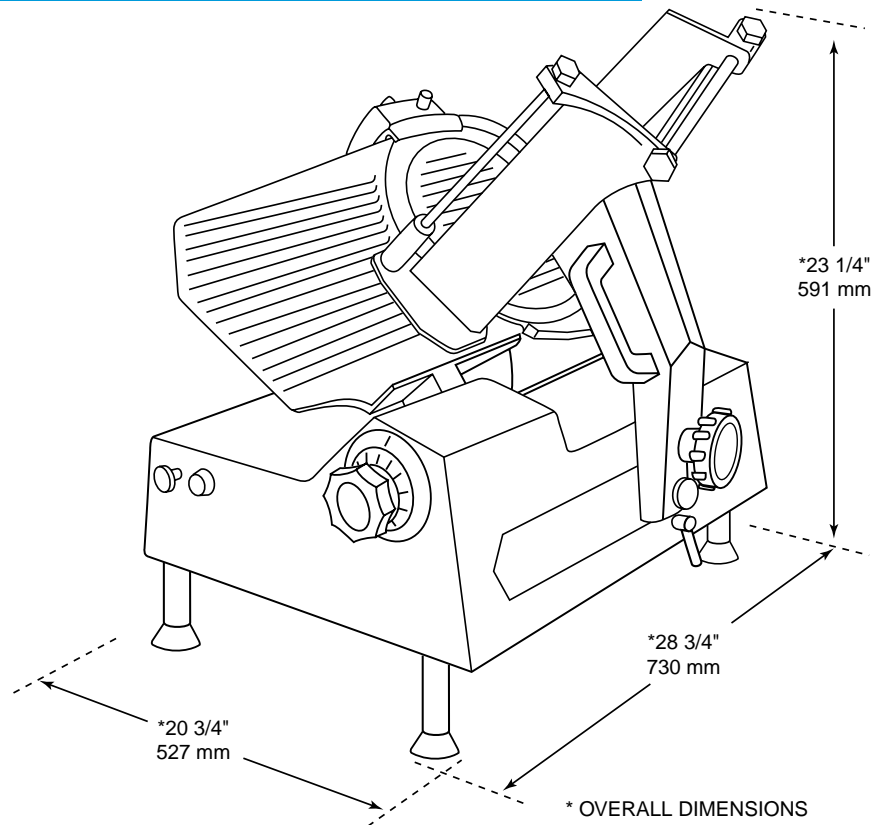

The MAX model 8512 Slicer carries a one-year, on-site parts and labor warranty against any flaws in materials and workmanship. This period begins with the date of purchase and, provided the unit is used properly in accordance with our instructions, is in full effect for one year from that date. Any work to be performed under this warranty must be performed between the hours of 8:00 a.m. and 5:00 p.m. local time, Monday through Friday. Univex will not pay overtime charges for work performed other than during normal business hours. Damages incurred in transit or from installation error, accident, alteration or misuse are not covered. Transit damages should be reported to the carrier immediately. Univex shall not be liable for any consequential, compensatory, incidental, or special damages. Contact Univex Service Department for any warranty claims.
