

TimeTech ST Model: TTS-4, TTS-8

The new TimeTech ST brand of cooking and holding timers are the innovative solution to quality and consistency at an affordable price.

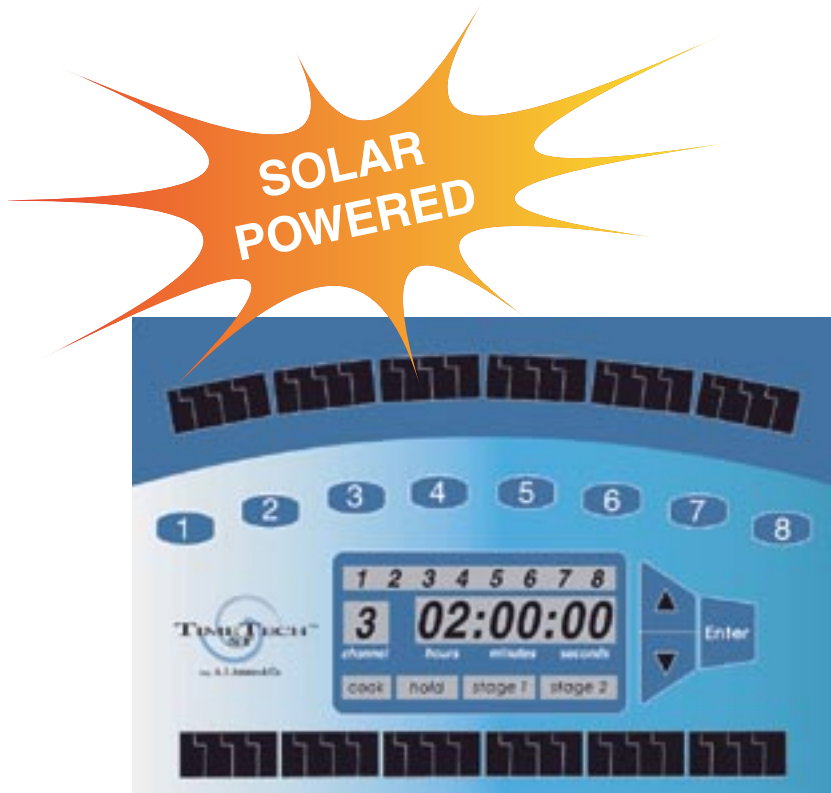

Currently available in four and eight channel models, these reliable timers are solar powered and require no electricity.

Easy to program and maintain, TimeTech ST Timers control up to two stages of your cooking or holding process and provide both audible and visual signals when timing is complete. Program times are stored in memory for repeat use.

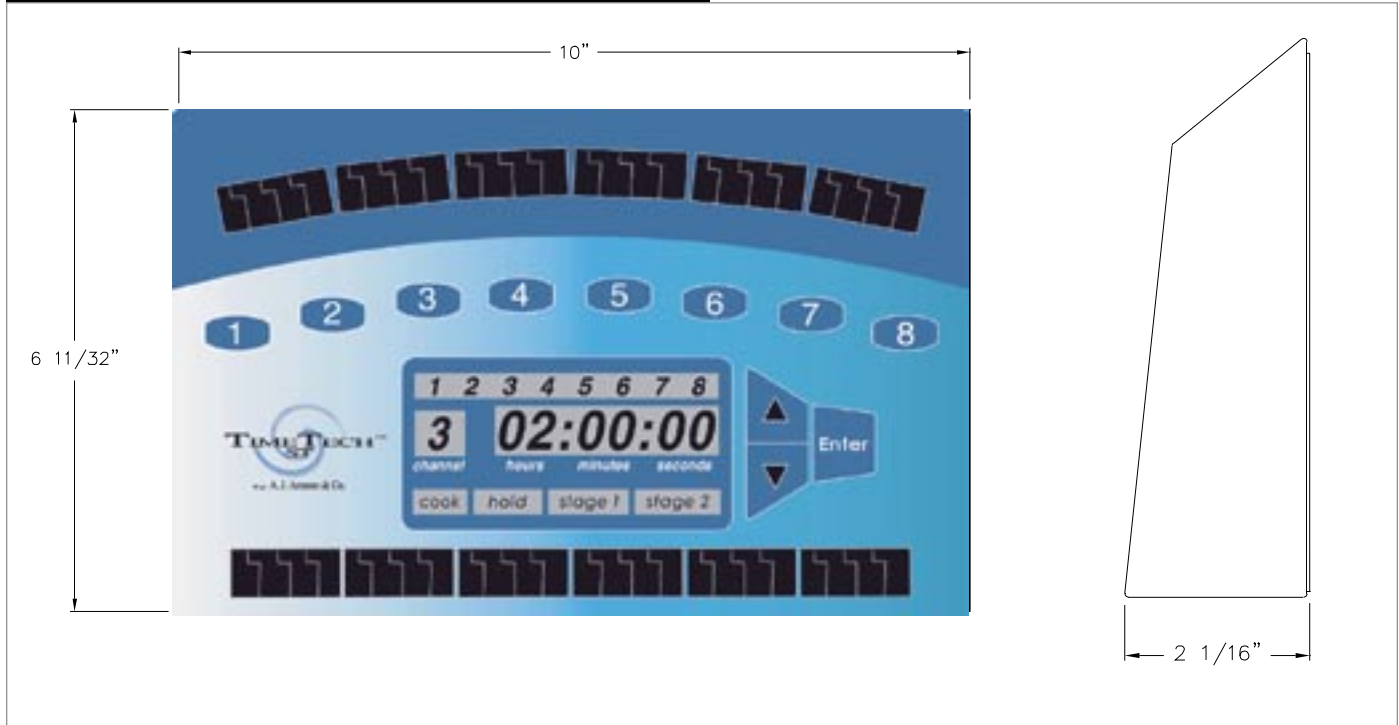

The magnetic mounting panel adheres to most metal surfaces and allows for flexible mounting of the unit. For those areas where no magnetic surface is available, magnetic mounting bracket is supplied.

Features:

- Solar Powered - No Electrical Outlet Required
- Quick and Easy to Install - No Tools Needed
- Two Stages - For Cooking or Holding Functions
- No Net Increase in Labor
- Four or Eight Channel Models
- Easy to Train Crew to Use
