

Standard Features

- 1.25 gallons per cycle
- "Whirl Wizard" adapts to any existing sink installation.
- Utilizes existing floor space - mounts underneath drain board of existing three compartment sink.
- Heavy duty one-horsepower wash pump motor with built-in thermal over-load protection.
- Wash pump designed with internal cutting blades to shred all food soil that passes through the filter.
- Built-in thermostatically controlled heating system to constantly maintain recirculating wash water at 110-120 degrees Fahrenheit.
- Illuminated Power On / Power Off switch operates both the recirculating wash pump and heating system.
- Package comes completely pre-wired with heavy duty grounded power cord and requires only 115 volts/ 20 amps/ 60 cycle/ single phase electrical outlet.
- Constructed of 304 series stainless steel.
- Adapts to both Left-to-Right and Right-to-Left operations.
- Adjustable legs allows pump and control head to properly adapt to any depth sink.

Detergent laden water is recirculated through the unique sink mounted agitator located in the drain hole of the wash sink.

NOTE: Installation of the WW-I requires drain plumbing of three compartment sink to slightly slope down from drain connection.

NOTE: The compact pump and control head is reversible for both Left-to-Right or Right-to-Left connections.
