BEVERAGE-AIR

**Commercial Refrigeration Equipment
General Specifications**

Direct Draw Beer Dispensers are available in 5 self-contained models up to 5 kegs capacity. Three models are available as club top (DD50C, DD58C and DD68C) for glasses, cans or bottles storage beneath an easy glide stainless steel lid.

All models feature forced air refrigeration to keep beer in kegs ice cold for dispensing. Three-inch (3") insulated towers are provided with single or multiple faucets. Each tower is adapted to have a continuous source of cold air channeled into it to keep beer at its coldest, best quality the moment it is dispensed.

Standard construction includes attractive, wear-resistant vinyl on steel exteriors in 2 choices of finish with black the most popular. Top is made from heavy-duty stainless steel including drip tray(s) for easy cleaning. Top includes capped opening for water station line penetration should the water station assembly be added.

Inside construction utilizes galvanized steel for walls and ceilings. Reinforced floors and doorsills are made from heavy-duty stainless steel to provide lasting service. Doors are self-closing and include key locks. Magnetic door gaskets provide positive door sealing. Interior lighting is provided as standard.

Cabinet insulation is foamed-in-place polyurethane (CFC free) which helps to provide maximum operating efficiency and strengthen the overall construction. Refrigerant used is R134a, which is CFC free for full compliance to all environmental concerns. A cord and plug is provided for electrical connection.
