GENERAL SPECIFICATIONS

ST SERIES

MODELS:
ST34N
ST49N
ST58N

Dual access, cold wall milk coolers are designed to hold milk between 32 and 38 until ready to serve. Produced in three sizes to hold 8, 12, and 16 milk cases (13" x 13" x 11") per unit.

Standard ST models include lids, doors, adjustable hinges, and door latches made from stainless steel. Balance of exterior is white finish on steel. Interior is galvanized steel. Floors are heavily reinforced. Heavy duty, epoxy coated steel wire floor racks are provided for added floor protection.

External thermometer, cylinder lock, bottom drain, and swivel casters (2 with locks) are provided as standard. Insulation is two inches thick foamed-in-place polyurethane, CFC free for compliance to environmental concerns. This insulation further strengthens overall construction and is impervious to liquid penetration and resulting foul odor. Overall depth of 31 1/2 inches allow easy mobility and clear passage through most doorways.

Models are also offered as standard with stainless steel exterior in place of white finish on steel. A stainless steel interior is optionally available. Additional options include wrap around and corner bumpers.

Refrigerant used is 404A, which is CFC free for full compliance to all environmental concerns. Service cord is provided at rear of cabinet for electrical plug in.
